

Chers collègues,

As part of the celebrations of International Year of Chemistry the European Science Foundation and COST - European Cooperation in Science and Technology are hosting an exhibition in the Museum of Natural Sciences, Rue Vautier 29, 1000 Brussels on June 24 and 25, 2011 on the theme of Astrochemistry – The Cradle of Life.

The Exhibition explores how chemistry is providing clues as to two of the great unanswered scientific questions How did life begin on Earth? Is there life elsewhere in the Universe?

The ESF and COST therefore cordially invite you to visit the exhibition - so have a day out !

Attached is a flyer for the event, please feel free to publicise the event to any colleagues (particularly in Belgium and Netherlands)

Yours sincerely
