

Dear all, I just receive this announcement:

Bioastronomy 2007: Molecules, Microbes, and Extraterrestrial Life
San Juan, Puerto Rico, on July 16-20, 2007.

<http://www.ifa.hawaii.edu/UHNAI/bioast07.htm>

Early registration deadline: January 15, 2007

Abstract / travel support deadline: February 15, 2007

This meeting is the ninth meeting in a series of meetings that have been organized by the

International Astronomical Union's Commission 51

on Bioastronomy. The series of Bioastronomy meetings have played an important role in integrating the broader interests and techniques of both astronomy and biology to understand the origin and evolution of our solar system, and of living systems in the universe. The theme of the 2007 meeting, 'Molecules, Microbes and Extraterrestrial Life',

deals with topics relevant both to solar system origins as well as to the origin of life.

Sincerely,

Christian Muller
